

A roadmap towards an effective Global Plastics Treaty*

Part 1 of 2: A set of core obligations for all countries

FOUNDATIONAL TREATY PILLARS

PRIORITIES FOR INC-5.2

Aligning on final treaty text

MANDATES FOR THE COP

Strengthening efforts over time

A Parties shall regulate **PLASTIC PRODUCTS, CHEMICALS USED IN PLASTIC PRODUCTS, AND PRODUCT DESIGN**, based on a common global approach, including timelines for implementation and potential exemptions

Art. 3 | Plastic products and chemicals: Establish an **initial list for global restrictions and phase-outs** to be included in an annex, and align on a set of clear criteria to identify additional products & chemicals to take measures on

Art. 5 | Product design: Agree on an obligation for parties to ensure that plastic products comply with **harmonised product design criteria**, including for priority plastic applications such as packaging, to be defined in dedicated annexes, and to be complemented by sector-specific guidance

Art. 3 | Environmental, health, socio-economic risks and impacts: Task a **scientific-technical review committee to conduct a comprehensive assessment** for specific categories of plastic products and chemicals used therein, and to recommend control measures

Art. 3+5 | Amendment of related annex(es): Adopt **global control measures, timelines for implementation and potential exemptions**, complemented by additional guidance for the national implementation of restrictions, phase outs, and criteria on product design, or other requirements

B Each party shall implement nationally determined measures to promote **SUSTAINABLE PRODUCTION AND CONSUMPTION OF PLASTICS, CIRCULAR ECONOMY APPROACHES AND BETTER PLASTIC WASTE MANAGEMENT**

Art. 6+7 | Plastic production and consumption: Agree to **continuously improve national policies** to promote sustainable production and consumption of plastics, including with the aim to eliminate **releases of micro- and nanoplastics**

Art. 8 | Waste management: Agree to introduce or advance **targets and systems for the collection, reuse and recycling of plastic products** in each country, supported by effective and well-designed **Extended Producer Responsibility (EPR) policies, including Deposit Return Schemes (DRS)**, and/or other economic instruments

Art. 9 | Existing pollution: Agree on an obligation for all parties to cooperate on **remediating existing plastic pollution**

Art. 6-9 | Adopt **common definition and key principles** for key policy instruments (e.g. EPR); adopt **quantitative and qualitative targets at the global level**, including **mandatory reporting on progress**, to guide national policies on sustainable production and consumption of plastics, reuse and recycling of plastic products, better plastic waste management, post-consumer recycled content (PCR), as well as prevention and remediation of plastic pollution

Programmes of work | Define priority categories of plastic products to develop **performance indicators and guidelines to ensure consistent implementation of sectoral approaches** across all relevant core obligations (Art. 3-9)

Version of 13th May 2025

*This roadmap highlights critical elements of the [Business Coalition's Vision Statement](#) in order to help governments align on a final treaty text at [INC-5.2](#), covering all relevant aspects of the [UNEA resolution 5/14](#). The ambition is to agree on a set of strong core obligations for countries to tackle pollution across the plastics lifecycle, complemented by effective mechanisms for implementation support. This includes clear mandates to the Conference of the Parties (COP) to prepare and adopt future decisions to help national governments to strengthen their efforts to end plastic pollution over time.

A roadmap towards an effective Global Plastics Treaty*

Part 2 of 2: Enabling effective implementation

FOUNDATIONAL TREATY PILLARS

PRIORITIES FOR INC-5.2

Aligning on final treaty text

MANDATES FOR THE COP

Strengthening efforts over time

<p>C Each party shall develop NATIONAL PLANS containing policy actions and implementation measures, and provide regular REPORTING ON PROGRESS to inform the COP's EFFECTIVENESS EVALUATION</p>	<p>Art. 14 National plans: Agree on key elements to inform target setting, stakeholder engagement and monitoring of progress at country level</p> <p>Art. 15 Reporting: Decide on the format and periodicity for reporting on the implementation of the core obligations</p> <p>Art. 17 Information exchange: Recognise the need to improve transparency across the plastics value chain, including through requirements to assess and disclose information on corporate risks, impacts and dependencies on plastic use</p>	<p>Art. 14 National plans: Adopt modalities and guidelines for their development</p> <p>Art. 16 Effectiveness evaluation: Adopt progress indicators to inform future COP decisions</p> <p>Art. 20 Decision making: Ensure a swift COP response to the effectiveness evaluation by adjusting existing or adopting new targets, measures, programmes of work, or timelines for their implementation</p>
<p>D Parties shall cooperate on IMPLEMENTATION SUPPORT through capacity building, resource mobilisation and finance, knowledge exchange and access to technology</p>	<p>Art. 11 Finance: Agree on a strategy for resource mobilisation, and on a strong financial mechanism</p> <p>Art. 12 International cooperation: Agree to facilitate access to knowledge and technology, including dedicated support for Micro, Small, and Medium-sized Enterprises (MSMEs)</p>	<p>Art. 11 Finance: Adopt instruments to mobilise public and private finance to address priority issues identified by the COP</p> <p>Art. 12 International cooperation: Establish a competence centre and a collaborative platform to tackle key plastic waste management challenges in developing countries</p>
<p>E Each party shall promote a JUST TRANSITION AND INCLUSIVE STAKEHOLDER ENGAGEMENT</p>	<p>Art. 10 Just transition: Establish an obligation to engage with relevant stakeholders to address plastic pollution in a way that is fair and inclusive to everyone concerned – workers, enterprises and communities – in particular by advancing human rights, and creating decent work opportunities in the plastic value chain, and developing adequate mechanisms for the participation of waste pickers</p>	<p>Art. 10 Just transition: Adopt clearing house mechanism to ensure that obligations and national plans are implemented in a fair and non-exclusionary manner, including for waste pickers and workers in informal or cooperative settings</p> <p>Art. 17 Information exchange: Establish a platform for multi-stakeholder initiatives to inform and support the development and implementation of programmes of work</p>
